**TESTIMONIAL: JOZI@WORK BUSINESS MANAGEMENT TRAINING  
PROGRAMME 15-23 September 2016**

Dear Thato

The purpose of Business Management Training Programme was to ensure that SMME'S/Co-operatives gain knowledge in budgeting, proposal writing and other business skills required to pursue their future business endeavours.

Since training was conducted after the project has collapsed, the use of the above skills was not witnessed but SMME'S and Co-operatives indicated that they are happy with the above skills and I believe this is going to help their businesses to grow further.

I really like your entrepreneurship development approach because you allow SMME'S and Co-operative to engage practically in every exercise and that further helps to make exercise easy and also accommodate the slow learners.

The training was fruitful to all SMME'S/Co-operatives because they were empowered on various business skills that will help to develop and market their business without limitations.

Without fear or favour, I will recommend your business to other projects that will require the same skills. The facilitators were very knowledgeable and had expertise to deliver the programme. Overall we were impressed by your service. Keep it up!

Regards  
Desmond Sithole  
Project Co-ordinator
